

## NEW FC 375

We introduce the new **FC 375** wheel balancer which is replacing our FC 370.

We keep making a step forward by proposing you a model which looks definitely more attractive than the previous version.

Furthermore some important technical upgradings have been done in order to offer our customers a wheel balancer with a higher performance:

- Axle capacity of 75 kg instead of 65 kgs
- Max wheel diameter of 1118 mm instead of 870 mm
- More distance between the body of the machine and the flange position (to help fixing the weight in an easier way)
- Automatic positioning of the wheel in the unbalance position
- Automatic brake to stop the wheel at the end of the spin
- ALU SPECIAL programs which are easier to use than the equivalent ones in model FC 370
- 2 specific programs for MOTORBIKE aluminium rims
- Selection of the 2 most used programs
- Spin overall and partial number counter
- Possible integration of the special S-WEIGHT program

**The new FC 375 is already available!**
