

NEW WHEEL BALANCERS

Two new wheel balancers have officially joined our range of products replacing the models FC 290 and FC 310.

The new **FC 295** and **FC 315** represent an improvement in terms of performance and our technicians assure these balancers are even easier to use.

Please pay your attention on the improvements we have made :

- Axle capacity of 75 kg instead of 65 kgs
- Max wheel diameter of 1118 mm instead of 870 mm
- More distance between the body of the machine and the flange position (to help fixing the weight in an easier way)
- 5 programs for aluminium rims instead of 4 programs
- 2 ALU SPECIAL programs with many different possibilities
- HIDDEN WEIGHT program for both models FC 295 and FC 315
- Dynamic program for MOTO for applying 2 weights on the wheel

Our FC 295 and FC 315 are now available. We look forward to confirming our conditions hoping to receive soon your precious opinion.
